The history of statistics in the modern sense originates from the term statistics, coined in 1749 in Germany. Although there have been changes to the interpretation of the word over time. The development of statistics is intimately connected on the one hand with the development of sovereign states, particularly European states following the Peace of Westphalia (1648); and the other hand with ...

x This phase II study tested the hypothesis that the dose of consolidation RT can be reduced from 30 Gy to 20 Gy in diffuse large B-cell lymphoma. All patients (n=62) were in a complete metabolic response by PET-CT after chemo-immunotherapy. Bulky disease was present in 40%. Five-year local control using 20 Gy was 98%.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Multinomial Application: Gives probability of exactly  $n_i$  outcomes of event  $i$ , for  $i = 1, 2, \dots, k$  in  $n$  independent trials when the probability  $p_i$  of event  $i$  in a single trial is a constant. Used frequently in quality control and other industrial problems. Example: Four companies are bidding for each of three contracts, with specified success probabilities. What is the probability that a ...
