The brevity and apparent lack of formal structure in the Op. 28 set caused some consternation among critics at the time of their publication. [verification needed] No prelude is longer than 90 bars (No. 17), and the shortest, No. 9, is a mere 12 bars. Schumann said: "[t]hey are sketches, beginnings of *Å*tudes, or, so to speak, ruins, individual eagle pinions, all disorder and wild confusions."

1. Introduction. Our goal here is of a purely theoretical question, however which may be fundamental, especially in the area of computational partial differential equations: Can the hyperbolic linear solution-structure of Kleinâ€“Gordon equation be directly used to construct the nonlinear solution for telegraph equation? For that, we start by reviewing the telegraph equation.
