Green building (also known as green construction or sustainable building) refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle: from planning to design, construction, operation, maintenance, renovation, and demolition. This requires close cooperation of the contractor, the architects, the ...

Construction is the process of constructing a building or infrastructure. Construction differs from manufacturing in that manufacturing typically involves mass production of similar items without a designated purchaser, while construction typically takes place on location for a known client. Construction as an industry comprises six to nine percent of the gross domestic product of developed ...

Managing Agents have a key role to play in improving the environmental performance of the commercial property sector. The policies adopted by the Managing Agent for a building can have a dramatic effect on its environmental impact, as well as the drive to reduce CO 2 emissions across the sector. They are often the conduit linking owners and occupiers and are ideally placed to appreciate and ...
