Unlock new insights from your data with Azure SQL Data Warehouse, a fully managed cloud data warehouse for enterprises of any size that combines lightning-fast query performance with industry-leading data security. Optimize workloads by elastically scaling your resources in minutes.

SQL Data Warehouse | Microsoft Azure

Here is the ideal field guide for data warehousing implementation. This book first teaches you how to build a data warehouse, including defining the architecture, understanding the methodology, gathering the requirements, designing the data models, and creating the databases.

Building a Data Warehouse: With Examples in SQL Server

The key advantages of the Inmon approach are: The data warehouse truly serves as the single source of truth for the enterprise, as it is the only source for the data marts and all the data in the data warehouse is integrated.

The Data Warehouse Toolkit

A data mart is a structure / access pattern specific to data warehouse environments, used to retrieve client-facing data. The data mart is a subset of the data warehouse and is usually oriented to a specific business line or team. Whereas data warehouses have an enterprise-wide depth, the information in data marts pertains to a single department.

Data mart - Wikipedia

An operational data store (or "ODS") is used for operational reporting and as a source of data for the Enterprise Data Warehouse (EDW). It is a complementary element to an EDW in a decision support

landscape, and is used for operational reporting, controls and decision making, as opposed to the EDW, which is used for tactical and strategic decision support.

Operational data store - Wikipedia

At the Microsoft Ignite conference, Microsoft announced that SQL Server 2019 is now in preview and that SQL Server 2019 will include Apache Spark and Hadoop Distributed File System (HDFS) for scalable compute and storage. This new architecture that combines together the SQL Server database engine, Spark, and HDFS into a unified data platform is called a "œbig data cluster"œ, deployed as ...
