Assessment of soil erosion by RUSLE model using remote sensing and GIS - A case study of Nethravathi Basin

Assessment of soil erosion by RUSLE model using remote

Using Eq. , the optimal canal cross section for minimum water loss for a specified value of m , can obtained. Once, the value of b and y_n are calculated, 4.2. Velocity-constraint. The minimum permissible velocity, V_{min} or the non-silting velocity is the lowest velocity that will not initiate sedimentation and will not induce the growth of vegetation. . Sedimentation and growth of vegetation ...

Design and analysis of a canal section for minimum water

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.
