Properties of LED light can boost poultry production and profits (MAGAZINE) Published on: June 5, 2014 The energy-efficient, narrow-band emission of LED sources makes the lighting technology valuable in life science applications.

Properties of LED light can boost poultry production and

C. Properties of Light What is light? This question has been debated for many centuries. The sun radiates light, electric lights brighten our darkness, and many other uses of light impact our lives daily. The answer, in short, is light is a special kind of electromagnetic energy. The speed of light, although quite fast, is not infinite.
