Understanding Retrospective vs. Prospective Study designs. Andreas Kalogeropoulos, MD MPH PhD. Assistant Professor of Medicine (Cardiology) Emory University School of Medicine

### **Understanding Retrospective vs. Prospective Study designs**

In retrospective cohort studies, two groups are retrospectively identified and "prospectively" compared according to the following model: A cohort of healthy subjects is subdivided into two groups "one exposed to a given factor and the other nonexposed to the same factor (Figure 1.4).

### **Retrospective cohort study - an overview | ScienceDirect**

Retrospective study designs are generally considered inferior to prospective study designs. Therefore, a retrospective study design should never be used when a prospective design is feasible. Key words: research, respiratory care, research methodology, study design, retrospective, case control.

### **Retrospective Studies and Chart Reviews - Respiratory Care**

In a retrospective study, in contrast to a prospective study, the outcome of interest has already occurred at the time the study is initiated. There are two types of retrospective study: a case-control study and a retrospective cohort study.

### **Retrospective Study - SAGE Research Methods**

Objectives The study intended to examine the rates of successful treatment of infertile women using a protocol of manual physical therapy to address underlying adhesive disease leading to infertility. Methods The research team designed a retrospective chart review. Setting The study took place in a private physical therapy clinic.
