

russian space probes scientific pdf

The Venera (Russian: Венера, pronounced [vɛˈnʲɛrɐ]) series space probes were developed by the Soviet Union between 1961 and 1984 to gather data from Venus, Venera being the Russian name for Venus. As with some of the Soviet Union's other planetary probes, the later versions were launched in pairs with a second vehicle launched soon after the first.

Venera - Wikipedia

The Russian Space Agency is one of the partners in the International Space Station (ISS) program; it contributed the core space modules Zarya and Zvezda, which were both launched by Proton rockets and later were joined by NASA's Unity Module. The Rassvet module was launched aboard Space Shuttle Atlantis and will be primarily used for cargo storage and as a docking port for visiting spacecraft.

Space The Far Lands DESCRIPTION: Space is the final frontier, not because its exploration is the pinnacle of human endeavour -- it isn't -- but because it is vast. The third of three pages on Space (one of the Field Nodes comprising the subject tree of The Telson Spur), this page is a list of links to on-line resources on the future of space exploration (including space development, space ...

The Telson Spur: Field Nodes -- Space (3): The Frontier

The goal of the Space Studies Colloquium is to bring guest researchers from the astronomical and space science communities in both industry and academia to support space-related scholarship in the Department of Space Studies and at UND and other North Dakota institutions of higher education.
