Sam Hinton provides an introduction to this fascinating zone and its contiguous waters and to some of the many creatures who make the southern California seacoast th Known as the intertidal zone, the area between the land and the sea is defined by the extremes of the tides.

Seashore Life of Southern California by Sam Hinton

Life Between the Tides: The Natural History of the Common Seashore Life of Southern California. American Southwest Publishing Co., San Diego. Paperback, 228 pp. ISBN 0-933177-00-3. This small book is a good one to take into the field for studying Southern California tidepools.

Annotated Bibliography: - Walla Walla University

seashore for the day. In addition pristine dune plants, rare bird species and other animals (including alligators) call CNS their home (though thankfully the latter don't crawl down the beach!) The waters of CNS also shelter rays, dolphins and yes, sharks, which will be present wherever fish and other sea creatures (a.k.a. food to sharks) exist.

Introduction to the Canaveral National Seashore

Elephant seals born on Point Reyes National Seashore beaches are tagged by Point Reyes biologists soon after they are weaned and separated from their mothers. The Point Reyes tags are pink and have a discrete number for each individual. When these seals turn up on other beaches, researchers can look up information about the seal.
