

space radioisotope power systems pdf

A radioisotope thermoelectric generator (RTG, RITEG) is an electrical generator that uses an array of thermocouples to convert the heat released by the decay of a suitable radioactive material into electricity by the Seebeck effect. This generator has no moving parts. RTGs have been used as power sources in satellites, space probes, and unmanned remote facilities such as a series of lighthouses ...

Communications: Curiosity is equipped with significant telecommunication redundancy by several means – an X band transmitter and receiver that can communicate directly with Earth, and a UHF Electra-Lite software-defined radio for communicating with Mars orbiters. Communication with orbiters is the main path for data return to Earth, since the orbiters have both more power and larger antennas ...

I don't know if it is going to be commercially viable to return the PGM's - but if it is going to be viable at all, to set up a space settlement supported by commercial industry - it seems most likely to be viable on the Moon perhaps even before asteroids - given the easy accessibility (the lowest delta v asteroids have orbits most similar to Earth's and so phase in and out slowly so are most ...
