Organic food is food produced by methods that comply with the standards of organic farming. Standards vary worldwide, but organic farming, in general, features practices that cycle resources, promote ecological balance, and conserve biodiversity. Organizations regulating organic products may restrict the use of certain pesticides and fertilizers in the farming methods used to produce such products.

VULNERABLE POPULATIONS: Pregnant women and breast-feeding mothers REGULATIONS: DBP and DEHP are banned in cosmetics sold in the EU. HOW TO AVOID: Read the labels on nail products, and choose options that do not contain DBP. Some nail product labels indicate they are “phthalate-free.” Products that list “fragrance” on the label should be avoided to prevent possible exposure to phthalates.

An experiment is a procedure carried out to support, refute, or validate a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.
