In mathematics, topology (from the Greek $\tau\omicron\pi\omicron\iota\varsigma$, place, and $\lambda\omicron\gamma\omicron\sigma$, study) is concerned with the properties of space that are preserved under continuous deformations, such as stretching, twisting, crumpling and bending, but not tearing or gluing.. An n-dimensional topological space is a space (not necessarily Euclidean) with certain properties of connectedness and compactness.

Pure and Applied Mathematics Journal (PAMJ) is a mathematical journal for publishing early, high-impact results in the areas of mathematics and computer science/informatics. The journal also emphasizes mathematical articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, engineering and all applied sciences.

International Journal of Theoretical and Applied Mathematics (IJTAM) is a peer-reviewed journal on all areas of theoretical and applied mathematics and methods to solve problems in engineering, natural sciences, and business through mathematical, computational and statistical methods. Topics of interest include, but are not limited to: pure mathematics, applied sciences, approximation theory ...

International Journal of Theoretical and Applied

Stieltjes, Perron, and Markov in analysis of the moment problem, for absolutely continuous measures, constructed the underlying measure as the discontinuity across the cut of a Cauchy representation of an otherwise real-analytic function.
