Tattoo removal has been performed with various tools since the start of tattooing. While tattoos were once considered permanent [citation needed], it is now possible to remove them with treatments, fully or partially. The "standard modality for tattoo removal" is the non-invasive removal of tattoo pigments using Q-switched lasers. Different types of Q-switched lasers are used to target ...

Tattoo removal - Wikipedia

If the face a teenager presents to the world is marred by prominent lesions of acne, the ordinary stresses of adolescence can be that much more difficult to weather.

Background Infective endocarditis is a potentially lethal disease that has undergone major changes in both host and pathogen. The epidemiology of infective endocarditis has become more complex with today's myriad healthcare-associated factors that predispose to infection. Moreover, changes in pathogen prevalence, in particular a more common staphylococcal origin, have affected outcomes ...
