Sample size determination is the act of choosing the number of observations or replicates to include in a statistical sample. The sample size is an important feature of any empirical study in which the goal is to make inferences about a population from a sample. In practice, the sample size used in a study is determined based on the expense of data collection, and the need to have sufficient ...

Determination of Relative Humidity in Subzero Temperatures

In celestial navigation, lunar distance is the angular distance between the Moon and another celestial body.The lunar distances method uses this angle, also called a lunar, and a nautical almanac to calculate Greenwich time.That calculated time can be used in solving a spherical triangle. The method was published in 1763 and used until about 1850 when it was superseded by the marine chronometer.
