HP 33s scientific calculator user's manual

A wafer tumbler lock is a type of lock that uses a set of flat wafers to prevent the lock from opening unless the correct key is inserted. This type of lock is similar to the pin tumbler lock and works on a similar principle. However, unlike the pin tumbler lock, where each pin consists of two or more pieces, each wafer in the lock is a single piece.

Fig 3: Macro vs. Micro Learning. Early in a role, we need "macro learning" to get started: understanding the job, the domain, the people, the systems.

The Disruption of Digital Learning: Ten Things We Have

Public-key cryptography, or asymmetric cryptography, is a cryptographic system that uses pairs of keys: public keys which may be disseminated widely, and private keys which are known only to the owner. The generation of such keys depends on cryptographic algorithms based on mathematical problems to produce one-way functions. Effective security only requires keeping the private key private; the ...

Why Should I Care About Computer Security? Computers help us maintain our financial, social, and professional relationships. We use them for banking and bill paying, online shopping, connecting with our friends and family through email and social networking sites, researching data posted on the Internet, and so much more. We rely heavily on our computers to provide these

Before You Connect a New Computer to the Internet

What are website certificates? If an organization wants to have a secure website that uses encryption, it needs to obtain a site, or host, certificate.
